

## **MOBILE GROUND CONTROL STATIONS - GCS** *Ruggedized cybersecure control for tactical and industrial missions*

Mobilicom's family of Mobile Ground Control Stations (GCS) delivers reliable, secure, and field-proven control for mission-critical drone and robotics operations. Each system combines ruggedized hardware, embedded datalinks, ICE Cybersecurity Suite, and extended battery life to ensure secure performance in the world's most demanding environments.

### **FIELD-PROVEN TERMINALS FOR A WIDE RANGE OF APPLICATIONS**

- Mobile Tactical Controllers & Viewers
- All-in-One unified solution (control station, data link, ICE Cybersecurity suite, battery & charging, ruggedized tablet)
- ICE Cybersecurity suite (Protection layers for Communication, Platform and Data)
- Support for embedded data link or external data link operation
- Ruggedized IP65 solution
- In field swap of battery and screen
- Available interfaces enable connecting to external screens, video, Hard disk, Telemetry, etc.
- Support control and Telemetry for drone/robot, sensors & payload operation
- Compact & lightweight
- Optional customization designs

7" and 8" Controllers

**8" CONTROLLER PRO**

Balances portability and power with more screen space than smaller GCS for visual applications.

**7" MINI CONTROLLER PRO**

Lightweight, portable, and tactical, suited for scenarios requiring frequent movement and deployment.

10" Controllers

**10" MAXI CONTROLLER PRO**

Designed for fleets and multi-drone operations, optimized for Group 2 and 3 UAVs.

**10" EXTREMES**

Large-screen table-top GCS, ideal for UAVs in long-range and long-duration operations.

**10" TOUCH-G**

Handheld, tactical touchscreen GCS for single or fleet drone operations with embedded radios and power. Usable as a remote video terminal.
